NEW AMERICANS IN THE GEM STATE: The Political and Economic Power of Immigrants, Latinos, and Asians in Idaho

Immigrants, Latinos, and Asians account for growing shares of the economy and electorate in Idaho. Immigrants (the foreign-born) make up 5.9% of the state's population, and nearly a third of them are naturalized U.S. citizens who are eligible to vote. "New Americans"—immigrants and the children of immigrants—account for 4.7% of registered voters in the state. Immigrants are not only integral to the state's economy as workers, but also account for billions of dollars in tax revenue and consumer purchasing power. Moreover, Latinos and Asians (both foreign-born and native-born) wield \$3.2 billion in consumer purchasing power, and the businesses they own had sales and receipts of \$635.7 million and employed nearly 6,000 people at last count. At a time of economic recession, Idaho can ill-afford to alienate such a critical component of its labor force, tax base, and business community.

Immigrants and their children are growing shares of Idaho's population and electorate.

- ➤ **The foreign-born share** of Idaho's population rose from 2.9% in 1990, to 5.0% in 2000, to 5.9% in 2008, according to the U.S. Census Bureau. Idaho was home to 89,489 immigrants in 2008.
- ➤ 31.3% of immigrants (or 28,023 people) in Idaho were naturalized U.S. citizens in 2008⁵—meaning that they are eligible to vote.
