**NEW AMERICANS IN MISSOURI:
The Political and Economic Power of Immigrants, Latinos, and Asians
in the Show-Me State**

Immigrants, Latinos, and Asians account for growing shares of the economy and population in Missouri. Immigrants (the foreign-born) make up 4% of the state's population, and 41.6% of them are naturalized U.S. citizens who are eligible to vote. "New Americans"—immigrants and the children of immigrants—account for 2.2% of registered voters in the state. Immigrants are not only integral to the state's economy as workers, but also account for billions of dollars in tax revenue and consumer purchasing power. Moreover, Latinos and Asians (both foreign-born and native-born) wield \$9.8 billion in consumer purchasing power, and the businesses they own had sales and receipts of \$5.1 billion and employed more than 34,000 people at last count. At a time when the economy is still recovering, Missouri can ill-afford to alienate such a critical component of its labor force, tax base, and business community.

Immigrants and their children are growing shares of Missouri's population and electorate.
